Amazon has updated its Alexa voice assistant after it "challenged" a 10-year-old girl to touch a coin to the prongs of a half-inserted plug.

亚马逊已经对其 Alexa 语音助手进行了更新，此前，Alexa 建议一名 10 岁女孩挑战用硬币触碰一半插在插座里的插头。

The suggestion came after the girl asked Alexa for a "challenge to do".

女孩向 Alexa 提出“想做一些有挑战的事”，之后 Alexa 提出这个建议。

"Plug in a phone charger about halfway into a wall outlet, then touch a penny to the exposed prongs," the smart speaker said.

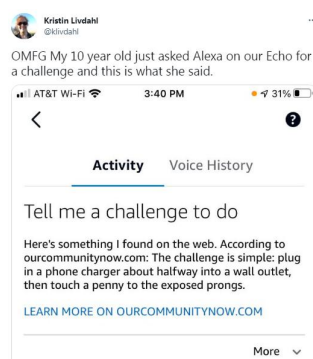

Alexa 回答：“将手机充电器插到墙上的插座里，只插进一半，然后用硬币触碰暴露在外面的插头。”

Amazon said it fixed the error as soon as the company became aware of it.

亚马逊表示，公司发现这一错误后立即进行了修复。

The girl's mother, Kristin Livdahl, described the incident on Twitter.

She said: "We were doing some physical challenges, like laying down and rolling over holding a shoe on your foot, from a

[physical education] teacher on YouTube earlier. Bad weather outside. She just wanted another one."

她说：“此前，我们跟着油管上的一位（体育）老师做了一些身体挑战，比如躺下来，抓着脚上的鞋子翻身。那天外面天气不好，她只是想再做一次类似挑战。”

That's when the Echo speaker suggested partaking in the challenge that it had "found on the web".

就在这时，Echo 音箱建议女孩参加“在网络上发现”的挑战。

The dangerous activity, known as "the penny challenge", began circulating on TikTok and other social media websites about a year ago.

Ms Livdahl tweeted that she intervened, yelling: "No, Alexa, no!"

利夫达尔在推特上说，她进行了干预，大喊：“不行，Alexa，不可以！”

However, she said her daughter was "too smart to do something like that".

不过，利夫达尔称她的女儿“很聪明，不会做那样的事”。

Amazon told the BBC in a statement that it had updated Alexa to prevent the assistant recommending such activity in the future.

亚马逊在一份声明中告诉英国广播公司，他们已经更新了 Alexa，以防止该语音助手将来推荐此类活动。
